Wire Journal International 1984 article index

Reprints of these articles are available from WIRE JOURNAL INTERNATIONAL.

Automation

"Host computer control of multiple wire and cable insulating lines." September 1984, p. 165.

Business

"Steel market outlook: Little growth, much competition." February 1984, p. 34.

"A question of demand." February 1984, p. 38.

"Copper and the economy: A mutual dependency." February 1984, p. 41.

"Entering the export market." April 1984, p. 73.

"Pricing your company fairly and effectively." September 1984, p. 189.

"A look at today's European wire industry." October 1984, p. 75.

Coatings

"Advantages of salt patenting wire and rod." May 1984, p. 44.

"The construction and use of patenting control charts." May 1984, p. 50.

"Properties of microalloyed high-carbon rods and wires." May 1984, p. 56.

"High-speed bright electrogalvanizing of ferrous wire." May 1984, p. 66.

"Trigalva steel wire with improved corrosion resistance and formability." October 1984, p. 64.

"Galfan: The Zn-Al coating for wire." November 1984, p. 69.

"Use of lubricants for corrosion protection on hard-drawn, high-carbon wire." December 1984, p. 48.

Computerization

"A low-cost system to monitor and control production in wire mills." March 1984, p. 66.

"Calculating the electrical and physical attributes of electronic cables." September 1984, p. 87.

"Improving operating efficiency with microcomputers." October 1984, p. 42.

Continuous casting

"Improvement of low-carbon steel wire rod qualities through continuous casting." July 1984, p. 82.

"Productivity and quality improvements through continuous casting." September 1984, p. 121.

"Filtration system design for a copper rod continuous casting facility." October 1984, p. 56.

"The influence of oxygen during hot rolling and drawing of continuous-cast rod." November 1984, p. 80.

Crosslinking

"Silane crosslinked insulation for medium-voltage power cables." June 1984, p. 60.

"An electron crosslinking center for insulated wire and cable." January 1984, p. 94.

Dies

"Die control: A powerful preventive maintenance tool for a copper wire plant." December 1984, p. 32.

"New thoughts on machinery for synthetic PCD die piercing and profiling." December 1984, p. 34.

"Die design for better performance." December 1984, p. 42.

Editorial

"Mutual concerns." January 1984, p. 4.

"A few predictions." February 1984, p. 4.

"Economics 101." March 1984, p. 4.

"Preserving competition." April 1984, p. 4.

"Defining productivity." May 1984, p. 4.

"Social responsibility." June 1984, p. 4.

"The evolutionary process." July 1984, p. 4.

"The human element." August 1984, p. 4.

"Debating free trade." September 1984, p. 4.

"One voice?" October 1984, p. 4.

"Finding capital." November 1984, p. 4.

"Talent hunt." December 1984, p. 4.

Extruding

"Economic losses from worn extruder screws." June 1984, p. 68.

Fabricating

"Coating fabricated wire products." February 1984, p. 46.

"Getting more from four-slides." March 1984, p. 84.

"The basics of spring manufacture." April 1984, p. 42.

"Lubricating and manufacturing techniques for the roll drawing of nonferrous shaped wires." April 1984, p. 44.

"A copper-based alloy for shape memory wire and springs." April 1984, p. 52.

"Production techniques for large springs." April 1984, p. 64.

"Cost savings through cold rolling." June 1984, p. 77.

"Annealing: The first step in cold forming." July 1984, p. 95.

"Valve spring wire rod manufacturing." August 1984, p. 64.

"Boosting the quality of finished parts." October 1984, p. 81.

Fasteners

"The language of fasteners." November 1984, p. 43.

"Tracking the demand for fasteners." November 1984, p. 49.

"Power-assisted turntables improve parts and fastener production." November 1984, p. 53.

Fiberoptics

"Strategic issues affecting worldwide markets for fiberoptic cable." August 1984, p. 40.

"Factory splicing of optical waveguide fiber." August 1984, p. 46.

"A new system of optical fiber stranding." August 1984, p. 54.

"Manufacture of thin Al tube containing optical fiber for OPT-GW." September 1984, p. 179.

Fine wire

"Fine wire market shows signs of recovery." June 1984, p. 41.

"Drawing fine wire: A cooperative effort." June 1984, p. 45.

"Drawing fine wire on wet wiredrawing machines." September 1984, p. 134.

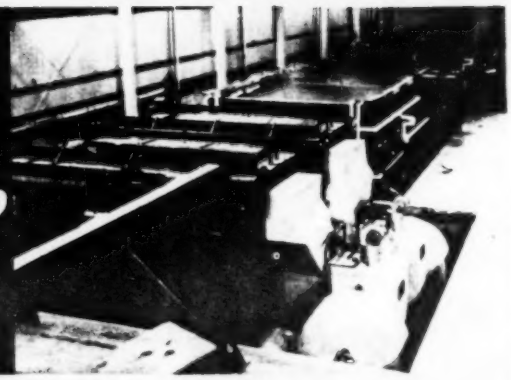
carl mayer
HI-SPEED
REGISTERED
ROD BAKERS



Faster baking, greater fuel economy, maximum production efficiency are just a few of the results of the exclusive heating arrangement of the Carl Mayer Hi-Speed Rod Baker. It also has a patented blow-off feature which removes moisture without-damage to coils.

Here are just a few of our many satisfied customers:

Armco Steel Corp.
Bethlehem Steel Corp.
Colorado Fuel & Iron Corp.
Crucible Steel Co. of America
Driver-Harris Co.
Indiana Steel & Wire Co.
International Nickel Co.
Jones & Laughlin Steel Corp.
National Screw & Mfg. Co.
Philadelphia Steel & Wire Corp.
Republic Steel Corp.
Sheffield Steel Div.
Armco Steel Corp.
Steel Company of Canada
Thompson Wire Company
Titanium Metals Corp. of America
Union Carbide Corp.
United States Steel Corp.
Universal Wire Div., Bostitch, Inc.
Youngstown Sheet and Tube Co.

J.B. Hyde & Mossberg:
The best of both braiding worlds

Mossberg Industries joins with Britain's J.B. Hyde Ltd. to bring you the best braiding technology on both sides of the Atlantic.

As Hyde's representative in the U.S., Canada, and Mexico, Mossberg stocks, sells, and services the industry-proven Hyde Packmaster, Plaitmaster, and Harness Braiders. Whether you produce packing materials, complex wiring harnesses, braided composites for high tech laminates, or rope and cordage, Mossberg can solve your most demanding braiding problem. To find out more, call TOLL FREE 1-800-556-7834 today.

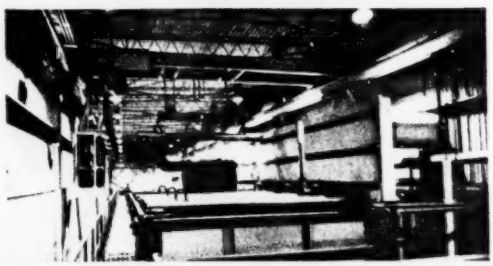
Keramchemie
Engineering excellence
working for you.



When you need process engineers, get the best in the industry.

Get Keramchemie engineering excellence working for you.

At Keramchemie, we have the expertise and know how in pickling systems design, and can put the very latest developments to practical use for you.

Best of all, you can just sit back while we take care of everything. At any level of involvement you require:
design, supply, supervision, construction, support systems, start-up, or a complete turnkey service—including buildings and systems—for rod and wire processing.

- BATCH PICKLE PLANTS
- AUTOMATED TUNNEL PICKLERS
- MULTISTRAND CLEANING & COATING LINES
- SULFURIC & HYDROCHLORIC ACID REGENERATION
- EFFLUENT CONTROL & FILTRATION

Whatever your needs, Keramchemie can do it for you.
From start to finish. For more information, call:

Keramchemie
Engineering excellence working for you.
